PROFILE

I have more than 6 years of experience in web development, including more than one year as an Angular Lead Developer. Over these years, I have worked on many enterprise web projects, in teams ranging from 5 to 50 people, with up to 5 developers on the development side.

My goal is to bring as much value as possible to your project by sharing my knowledge and best practices with the team. I also pay close attention to understanding business needs in order to propose the most effective solutions.

Expertise on the following technologies (see details in my experience):

- Angular, Node.js, NestJS, Express.js
- JavaScript, TypeScript
- REST API
- Git

EXPERIENCE

Groupe SII (ESN) · EDF (Client)

March 2026 - present · Lyon · Senior Angular Developer

On the INCA project at EDF: an application compiling information from around twenty internal EDF applications to make the work of account managers easier. The project is run by a team of around twenty people, including about fifteen developers.

- Implementation of features using TDD (Cypress E2E & Vitest unit tests)
- Support on AI best practices and agentic coding (Gemini CLI)

Skills:

MAIN: Angular, TypeScript, agentic coding

SECONDARY: Agile, TDD, DDD

Alteca (ESN) · BPCE-SI (Client)

January 2025 - March 2026 (1 year 3 months) · Angular Lead Developer · Lyon

On the Fiscalité project at BPCE-SI: redesign of the interface used to view monetary flows for an account and generate IFU tax forms. Agile Scrum project within a 50-person team, with a 10-person squad including 5 developers on the project.

- Upgraded the architecture and introduced Angular best practices
- Trained Angular developers
- Wrote unit tests (Jest)
- Supervised production deployment (Jenkins, XLDeploy)

Skills:

MAIN: Angular, TypeScript, Jest, REST API

SECONDARY: Agile, Jenkins, XLDeploy

Alteca (ESN) · BPCE-SI (Client)

September 2024 - January 2025 (5 months) · Angular Lead Developer · Lyon

On the Déshérence Eckert project at BPCE-SI: an interface allowing Caisse d'Épargne agents to update a customer's dormant-account status. Agile Scrum project within a 50-person team, with a 10-person squad including 3 developers on this project.

- Angular upgrade from 13 to 18
- Angular architecture migration: Modules → Standalone
- Rewrote unit tests (Jest)
- Trained Angular developers
- Supervised production deployment (Jenkins / XLDploy)

Skills:

MAIN: Angular, TypeScript, Jest, REST API

SECONDARY: Agile, Jenkins, XLDploy

HR Team - Groupe Scalian (ESN) · Sogelink (Client)

December 2023 - July 2024 (8 months) · Senior Angular Node.js Developer · Lyon

On Sogelink's Scodify project, a SaaS product that converts CAD files into a GIS database using an AI model. The project follows SAFe Scrum methodology and includes 5 people, including 3 developers.

Achievements:

- UI development (Angular) + REST API (Node.js)
- Introduced Angular and Git best practices
- Code review
- Interface redesigns

Skills:

MAIN: Angular, TypeScript, Node.js, REST API, Git

SECONDARY: PostgreSQL, MongoDB, Agile

HR Team - Groupe Scalian (ESN) · Sogelink (Client)

August 2021 - December 2023 (2 years 5 months) · Senior Angular Node.js Developer · Aix-en-Provence

On Phoenix 2.0, a complete redesign of Phoenix 1.0, an application used to process and analyze radar signals. The main application is developed in C++ and integrates Chromium-based web modules. Agile Scrum project within a 12-person team.

- Created mockups (Figma) and wrote user stories
- Set up the Angular architecture from scratch
- Integrated the graphic charter
- Code reviews
- Implemented unit tests (Jasmine)
- Resolved performance issues
- Developed a dynamic form generator
- Integrated GraphQL APIs

Skills:

MAIN: Angular, TypeScript, NestJS, GraphQL API

SECONDARY: Figma, Agile, Docker, Kubernetes

CTCPA - Food Industry Technical Center

July 2019 - July 2021 (2 years 7 months) · Angular .NET Developer · Avignon (France)

Redesign of the internal Steri'Opt application, used to run thermal-treatment schedule calculations, then save and consult results for agronomy technicians and food-industry manufacturers. Team of 5 people.

- Created UI/UX mockups (Figma)
- Developed frontend features (Angular) and backend features (.NET)
- Set up a REST API with Azure Functions
- Set up databases (PostgreSQL / CosmosDB)
- Set up CI/CD (GitHub Actions, Azure Cloud)
- Wrote unit tests (Jasmine) and end-to-end tests (Selenium)
- Implemented OAuth authentication
- Developed interactive charts (Chart.js)
- Set up asynchronous message queues (Azure Queue Storage)

Skills:

MAIN: Angular, TypeScript, .NET Core, REST API, Azure Cloud

SECONDARY: Figma, PostgreSQL, Selenium, CI/CD, unit and end-to-end tests

EDUCATION

University of Avignon and the Vaucluse Region

Master's degree in Computer Science, Software Engineering · (2014 - 2019)
